PRODUCT DESCRIPTION

Merco Pizza Dispensing Cabinets are the perfect choice for self-service situations. They are manufactured from heavy-duty aluminum alloys specifically selected for even heat transfer and easy cleaning. All models feature a spacious 3-level configuration and are available in three different sizes to meet any capacity requirement. A forward-slanted design keeps pizza boxes to the front where a stop bar allows easy access to lift the pizza box out. Insulated heat cable base heating with factory-set thermostatic control on each level is ideal for holding boxed pizza at peak flavor without continued cooking. Each level has bright incandescent illumination to enhance product display. Glass panels on each end contain warmth where you want it. A 6-foot cordset is provided for easy installation.
